Abstract: The specification describes a sheet material (1) having: (i) a substrate (2) of porous sheet material usually paper or other non-woven cellulosic fiber material used in the packaging industry (ii) a coating material (4) on the substrate. The coating material is able withstand the migration of susceptor metal particles (iii) the susceptor layer (5) is applied by a printing process and in the presence of a liquid carrier (iv) a food contactable plastic layer (7) which overlies the susceptor metal particles. The bags or packages may optionally contain printed material.
